

### **Preparation for 13+ STEMM Scholar Exam**

If you wish to prepare for this exam, you will need to revise the following topics:

Biology: Digestion and Practical Skills

Chemistry: Particle model of solids, liquids and gases, and changes of state

Physics: Electromagnets

General KS3 science: practical skills, and density, mass, and volume

The questions are KS3 level and a KS3 revision guide would be suitable for revising these topics. BBC Bitesize for KS3 is also useful.
